European Welding Association

European-welding.org

The European Welding Association (EWA) is an industrial association which comprises national welding associations and manufacturers of electric and flame welding equipment, welding and brazing consumables, equipment to ensure the health and safety of welders (fumes extraction systems included) **with a production In Europe.**

EWA was founded in 1958.

Objectives of the association:

the association focuses on the mutual technical and economic interests of the European welding industry and its customers by :

- Participating in the development and application of all relevant technical issues, standards, European directives, recommendations (from ECHA and REACH...) affecting the welding industry, in cooperation with trade organizations, EU authorities and all other relevant bodies.
- Publishing recommendations of the safe use of the welding and cutting
- Giving the position of the industry when necessary
- Gathering and analyzing the evolution and trends of industry
- Promoting the welding industry, and the safe use of welding / cutting

Code of conduct:

Relations between members and all EWA meetings are done with the strict respect of the EWA code of conduct. According the EWA code of conduct, every member agrees that EWA activities are at all times carried out in accordance with the applicable laws, especially competition laws.
